Cyberjaya, Malaysia

SUMMARY

IT student specializing in Cybersecurity with a practical focus on web development, automation, and systems-focused software builds. Experienced in creating responsive websites, offline-first tools, project documentation, and technical workflows across freelance, startup, and operations environments.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, HTML5, CSS3, Java, Kotlin, C++
- **Frameworks & UI:** React, Tailwind CSS, CustomTkinter, Lucide React, Font Awesome, responsive UI/UX
- **Tools & Platforms:** GitHub, VS Code, Vercel, GitHub Pages, Ollama, Microsoft Office, documentation workflows
- **Systems Focus:** database schema migration support, QMS refactoring, forms/email integration, local-first storage

SELECTED PROJECTS

ClariFi: Built an offline-first private finance tracker for independent creators and solo operators using React, TypeScript, Tailwind CSS, custom hooks, and browser localStorage.

D.A.V.E. - Direct Agentic Versioning Engine: Developing an autonomous local coding assistant in Python for multi-step code edits on smaller local models, using CustomTkinter, LibCST, Ollama, and API integrations.

Portfolio & Client Websites: Designed and deployed responsive sites for restaurants, creative/event brands, and service businesses with modern UI, conversion-focused layouts, and live integrations.

RELEVANT EXPERIENCE

CTO Systems Operations / QMS Refactoring | Project Work

- Supported refactoring of a large QMS web system, including backend/database schema migration from old structures to updated models.
- Worked across system documentation, data mapping, deployment checks, and functionality validation to preserve UX and operational continuity.

Freelance Web Developer | The Nanny Union Agency

- Built and delivered a premium service website for a nanny agency, focused on trust, brand presentation, and lead conversion.
- Integrated contact forms and email-routing flows to support client enquiries and service requests.

Lead Website & Creative Design | Midnight Anarchy | Jan 2024 - Present

- Developing and maintaining the web presence for an events collective while leading digital branding and promotional assets.
- Designed customer-facing experiences for event promotion, ticketing concepts, and cross-device engagement.

Technical Coordination & Support | Events / Campus Initiatives

- Managed technical setup, console systems, troubleshooting, sponsor coordination, and logistics for live events and tournaments.
- Created promotional materials and coordinated volunteer groups to meet technical requirements across sessions.

EDUCATION

Diploma in Information Technology (Cybersecurity)

SEGi College Kota Damansara | 2024 - Present
